FORMWERKS ARCHITECTURAL

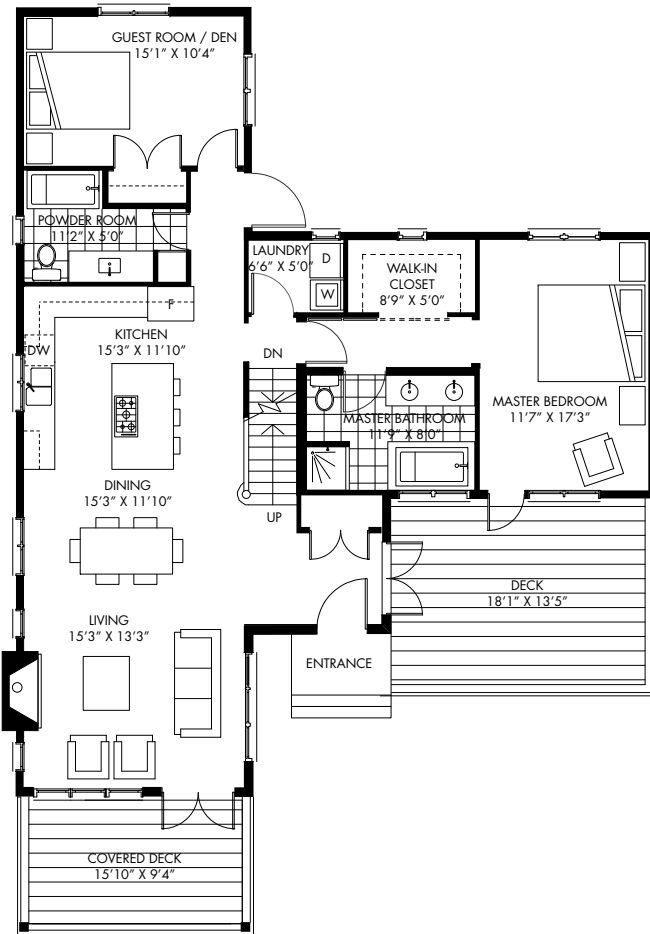

The Formwerks home is beautifully organized with an open plan main living space and a luxurious private master bedroom wing. The design features a loft space above the main living room with impressive views to the ocean. The home also features two large outdoor deck spaces accessible from the living room and master bedroom providing the opportunity for both public and private outdoor activities.

"There's drama here; the front door is wrapped by beautiful, polished timbers; the upper space is a loft that looks over the Great Room; that's dramatic, too. We wanted to let the outdoors come into the house, but we didn't want to make it "wild". Even in modern homes, there has to be warmth, so when you come home to a place, it gives you comfort and hominess."

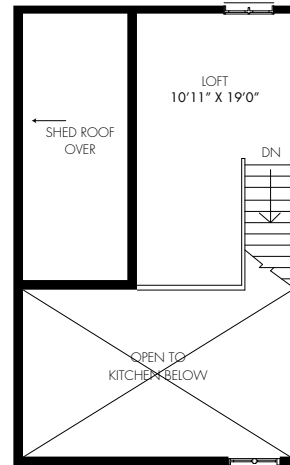

James Bussey, Formwerks Achitectural
